

NPP - NOTICE OF PRIVACY PRACTICES

DESCRIPTION

We designed the "NPP - Notice of Privacy Practices" site as a 100% self-contained fully responsive site.

NPP User Facing Demo Site: <http://theraj.org/nppdemo/>

NPP Admin Editor Demo Site: <http://theraj.org/nppdemo/admin/>

Admin Editor Site - Login Credentials

Username: **admin**

Password: **nppadmin**

GitHub Source Files: <https://github.com/therajorg/NPP/>

The design and setup of the site benefits both "End-Users" and "Entities" immediately.

Benefits To End-Users

- Access NPP site using a variety of devices (i.e. Desktop, Laptop, Tablet, Smartphone, etc.)
- Can reach any part of the site with just one or two clicks (or touch).
- Easy to navigate to any part of the site.
- Clear color-coded sections and icons for easy recognition.
- Available in both English and Spanish versions.

Benefits To Entities

- One-step simple setup and done within minutes (simple copy and paste of a folder).
- Does not affect any other part of the entity's existing web site, structure, or its pages.
- Easy to move/replicate to different servers (as simple as copy and paste to new servers/locations).
- Ready to host on secure "https" sites.
- Edit the NPP content directly with NPP "Admin Editor" tool - as simple as editing a text document.
- All notices content is formatted in industry standard JSON formatted files for easy editing and management.
- Content edited in the Admin tool is automatically formatted and displayed to the end-user.
- Using Admin Editor tool the admin can easily edit:
 - Edit both "Provider" and "Plan" notices.
 - Edit both English and Spanish versions.
 - Edit general information (i.e. Entity name, Effective date, Contact information, etc.)
 - If required, complex HTML and CSS tags can be used (no restrictions).

INSTALLATION

One-step installation - just copy and paste the "npp" website folder and all its contents on to your Web server and it is ready to use.

TECHNOLOGIES USED

Back-end : PHP (version 5.3+)

Front-end : HTML5, CSS, JavaScript (jQuery, and stand-alone javascripts)

SYSTEM REQUIREMENTS

Client - End-Users - i.e. User Facing Site

- Any modern browser(s) - i.e. Chrome, IE, Firefox, Safari, Opera, etc.
- Any type of device(s) - i.e. Desktop, Laptop, Tablet, Smartphone, etc.
- Any operating systems - i.e. Windows (8, 7, Vista, etc.), Mac OS X, Linux, Chrome OS, iOS, Android, Windows Phone, BlackBerry, etc.

Entity - Web Server

- PHP (version 5.3+)

Entity - Admin - i.e. Admin Editor Tool

- Any modern browser(s) - i.e. Chrome, IE, Firefox, Safari, Opera, etc.
- Type of device(s) - Desktop, Laptop.
- Operating system(s) - Windows (8, 7, Vista, etc.), Mac OS X, Linux.

STRUCTURE

The attached "NPP.zip" file consists of the following structure:

NPP

NPP\NPP-Readme.pdf - This file - Readme file.

NPP\NPP-Slides.pdf - Slides file.

NPP\Website - NPP User facing and admin sites (copy contents of this folder to your Web server).

NPP\Website\npp - NPP User facing web site.

NPP\Website\npp\admin - NPP Admin Editor site.

NOTE - DEMO vs. LIVE

Demo: The sites "<http://theraj.org/nppdemo/>" and "<http://theraj.org/nppdemo/admin/>" are setup as a demo for this challenge. To avoid accidental changes by public/reviewers/voters/etc. and to avoid confusion during review, the demo Admin Editor tool does not directly update the User facing site.

Live: The files in GitHub and attached "Website\npp\" folder contains live setup files, where the Admin Editor tool updates the User facing site directly. Try live version at "<http://theraj.org/npp/>" and "<http://theraj.org/npp/admin/>". The admin credentials for live site are same as the demo site.
